

Animal Enhancement Activity – ANM 23 – Multi-species native perennials for biomass/wildlife habitat

Enhancement Description

This enhancement consists of establishing native perennial vegetation for biomass production and wildlife habitat.

Land Use Applicability

Cropland, Pastureland, Rangeland

Benefits

Establishing multi-species native perennial vegetation and managing for both biomass and wildlife can provide natural resource and financial benefits.

Conditions Where Enhancement Applies

This enhancement applies to all crop, pasture, or range land use acres.

Criteria

1. Native perennial species shall be selected and planted based on site adaptability, value for biomass, and for wildlife benefits as determined by the state.
2. Biomass fields shall be managed for species of conservation concern as identified by the state and the State Wildlife Action Plans.
3. Develop a management plan, covering the length of the contract at a minimum, which minimizes impacts on wildlife species, especially grassland nesting birds for this enhancement activity. Management actions and their impact on affected wildlife species shall be addressed.
4. After establishment, the field shall be protected from grazing and disturbance during the primary nesting and fawning season as defined by the state. Further, harvesting of biomass must be in accordance with the written management plan. Partial removal in late summer/early fall to allow for re-growth for winter cover where winter conditions interfere with late season harvest should be addressed in the management plan.

Adoption Requirements

This enhancement is considered adopted when acres with established multi-species native perennials are being managed in accordance with the developed management plan for the species of concern.

United States Department of Agriculture
Natural Resources Conservation Service

2012 Ranking Period 1

Documentation Requirements

1. Copy of the management plan,
2. Written description of the actions taken,
3. Receipts related to the a multi-species native perennial establishment,
4. Dates of establishment, and
5. A map or aerial photograph delineating the location of the established vegetation.

ANIMAL ENHANCEMENT ACTIVITY

**ANM23 – OR Multi-species Native Perennials for
Biomass/Wildlife Habitat**

Criteria

- Biomass fields should be managed for species of conservation concern in the appropriate ecoregion as identified in the Oregon Conservation Strategy (ODFW 2006).
- Primary nesting and fawning period is March 1 - July 15.
