\*\*Large Water Error Estimates - Standard error estimates for this Land Cover/Use type are not comparable with other data due to computational differences and will not be shown.

NOTE: Data may not add to totals because of rounding. The error referred to in the table is the standard error of the estimate. You can obtain the margin of error at the 95% confidence limit by multiplying the error by 1.96. Standard errors greater than 50% of the estimate indicate a low level of statistical reliability.
