

**1992 to 1997 Prime Farmland Soils on Agricultural Lands*
 Converted to Urban Lands*, Farmsteads, and Rural Transportation
 Compared to Total Converted
 State of Oregon**

National Resources Inventory Results
Estimated for Non-Federal Lands Only

	Cropland Estimates	Cropland Error	Pastureland Estimates	Pastureland Error	Rangeland Estimates	Rangeland Error	Total Estimates	Total Error
- - - Estimated Acres - - -								
Total Prime Converted	18,000	**	14,900	**	1,000***	**	33,900	**
Total Converted	29,100	**	31,600	**	9,400	**	70,100	**

* See Details Page

** The estimates for prime and total converted between 1992 and 1997 were derived by adding the urban lands, farmsteads, and rural transportation estimates together. There are no standard error estimates for these estimates.

*** We have chosen to provide the complete Oregon NRI results for all natural resource land cover/use categories, including rangeland, in order to provide a complete "snapshot" of the state. It is important for the data user to recognize that the rangeland conversion estimate has a high standard error (100%) and should be used with caution. This type of result may be useful for grouping estimates into broad categories (such as high, medium, and low), but the numerical estimate itself has low reliability.
