\*\* The estimates for total agricultural lands converted between 1992 and 1997 were derived by adding the urban lands, farmsteads, and rural transportation estimates together. There are no standard error estimates for the 1982 to 1997 total converted lands.

NOTE: Data may not add to totals because of rounding. The error referred to in the table is the standard error of the estimate. You can obtain the margin of error at the 95% confidence limit by multiplying the error by 1.96. Standard errors greater than 50% of the estimate indicate a low level of statistical reliability.
